

SN. 10/021,890

ATTORNEY DOCKET NO. CANO:038

IN THE CLAIMS

The status of the claims as presently amended is as follows:

1. *(Currently Amended)* A data communication apparatus comprising:
 - an inputter arranged to input file data;
 - a setter arranged to set a field SUBJECT: of a header of an electronic mail to be transmitted based on a user input;
 - a producer arranged to produce a file name of the file data input by said inputter based on the field SUBJECT: set by said setter; and
 - a transmitter arranged to transmit electronic mail data including the file data input by said inputter, the field SUBJECT: set by said setter, and the file name produced by said producer.
2. *(Original)* A data communication apparatus according to claim 1, wherein said inputter inputs the file data obtained by reading an image on an original.
3. *(Original)* A data communication apparatus according to claim 1, wherein said inputter inputs the file data obtained from a detachable memory.
4. *(Previously Presented)* A data communication apparatus according to claim 1, wherein said producer produces the file name based on a number of the file data input by said inputter and the field SUBJECT: set by said setter.
5. *(Original)* A data communication apparatus according to claim 1, wherein said producer produces the file name in accordance with a kind of the file data input by said inputter.
6. *(Currently Amended)* A method of producing electronic mail data to be transmitted, comprising the steps of:
 - inputting file data;
 - setting a field SUBJECT: of a header of an electronic mail to be transmitted based on a user input; and
 - producing a file name of the file data input in said inputting step based on the field SUBJECT: set in said setting step.
7. *(Currently Amended)* A computer readable program stored in a storage medium, comprising:
 - an inputting module for inputting file data;

SN. 10/021,890

ATTORNEY DOCKET NO. CANO:038

a setting module for setting a field SUBJECT: of a header of an electronic mail to be transmitted based on user input; and

a producing module for producing a file name of the file data input by said inputting module based on the field SUBJECT: set by said setting module.
